

# Supplier Auditing

Contact us to reduce supplier risks  
and establish a stronger supply chain

The ISO 9001 Group performs audits on your critical suppliers to ensure that they are operating in compliance to your requirements. Because your supply chain is critical to your final products and services you offer to customers, our supplier auditing service can prove to be very valuable. Our Certified Lead Auditors will work with your company to establish a planned supplier audit program. We can utilize your audit criteria or develop audit criteria based upon management system standards, such as ISO 9001, ISO 14001, ISO 45001, API Spec Q1/Q2 and many more.

## VALUE OF SUPPLIER AUDITS

1. Meet requirements of management system standards
2. Gain confidence of suppliers' products and services
3. Identify risks and opportunities for supply chain improvement
4. Reduce negative impacts from poor supplier performance
5. Improve communication with suppliers
6. Improve customer satisfaction

## CLIENT TESTIMONIAL

"The ISO 9001 Group consultant took my call and listened to our needs. A few days later, we received a proposal to help us. Our consultant was always accessible for us and answered our questions right away. The investment we made has definitely paid for itself and beyond. I have referred several of my colleagues to The ISO 9001 Group and I would recommend them to any company that needs a consultant firm that they can trust, rely on and come at a reasonable price."

*Harry Hans, President  
SONA Networks*
